CHAPTER 1

Changelog

Listed are the high-level, notable changes for each django-cas-ng release. Backwards incompatible changes or other upgrade issues are also described here. For additional detail, read the complete [commit history](#).

django-cas-ng 3.5.7 [2016-11-06]

- Added the request to the signals
- Address #114 by providing a setting *CAS_STORE_NEXT*
- Change `authenticate()` argument order for changes in Django 1.11
- *CAS_REDIRECT_URL* should accept named URL patterns
- Add requests to requirements

django-cas-ng 3.5.6 [2016-11-06]

- Depends `python_cas>=1.2.0`

django-cas-ng 3.5.5 [2016-09-28]

- Login after the session is created, fix the need for double login (such as #83, might fix it but seems slightly different) * Fix #96 Login after the session is created, fix the need for double login * Fix #95 by delete django requirement from setup.py * Fix #91 - raise `PermissionDenied` rather than return `HttpResponseForbidden` * Add `check_additional_permissions` to the backend. This allows one to subclass the backend and add arbitrary user permissions checks when authenticating.

django-cas-ng 3.5.4 [2016-04-27]

- Support for string view arguments to `url()` is deprecated and will be removed in Django 1.10.
- Add migrations.
- Add initial migrations file.
- Add *CAS_FORCE_CHANGE_USERNAME_CASE* option to convert username case to lower or upper. This prevent duplicate account

creation in some case. * Bugfix for loop redirect when CAS_ADMIN_PREFIX is set as root.

django-cas-ng 3.5.3 [2015-11-20]

- Add translation mo files into release build.

django-cas-ng 3.5.2 [2015-11-19]

- Add python-cas to install_requires.

django-cas-ng 3.5.1 [2015-11-10]

- Remove the auto_now and keep the auto_now_add per the documentation.

django-cas-ng 3.5.0 [2015-11-08]

- Add support for Proxy Granting Ticket.
- Add Single Logout support.
- Add Python3 support.
- Add Django 1.8 support.
- Add support for custom user model.
- Add CAS_USERNAME_ATTRIBUTE which allows picking an alternative variable to store the username in the cas attributes.
- Add CAS_DISPLAY_LOGIN_MESSAGE setting to control whether show welcome message, default is true.
- Fix redirecting with the "?next" parameter.

django-cas-ng 3.4.2 [2015-01-11]

- Fix forbidden error.
- Add CAS_CREATE_USER setting to control over whether or not a user is created.

django-cas-ng 3.4.1 [2014-11-27]

- Specific django version in dependence.
- Removed the ticket GET param from the service, as it could break CAS.

django-cas-ng 3.4.0 [2014-11-12]

- Add signal support `django_cas_ng.signals.cas_user_authenticated`
- Add python 3.4 test env

django-cas-ng 3.3.0 [2014-11-05]

- Support Django 1.7
- Integrate with travis-ci

django-cas-ng 3.2.0 [2014-10-25]

- Add CAS_RENEW setting to enforce CAS renew feature. Default is False.
- Port to Python 3 (Python 2 also supported)
- Allow multiple attributes with the same name for CAS3

django-cas-ng 3.1.0 [2014-05-25]

- Support Django 1.5 custom user model.

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
